next step in sustainability

natural carpets

next step in sustainability

Wool is a natural and renewable resource: since there is grass to eat, sheep will produce wool. When wool is disposed of, it will naturally decompose in soil in a matter of months, releasing valuable nutrients into the earth. Synthetic fibres, on the other hand, can be extremely slow to degrade and significantly contribute to the world's overflowing landfills.

a piece of wool history in your home!

Purchasing a wool carpet becomes an investment in something greater than just an interior element. It's an investment in durability, healthy life and culture, which will accompany you at every step of your life. Our company is focused on production of natural carpets and rugs and we are ready to offer a wide range of wool products - including very affordable collections.

choose wool

Natural & Hypoallergenic fibre

Wool is a 100% natural product, obtained all year-round from sheep, which are consuming a simple blend of water, air, sunshine and grass.

Warm & Cool

Comparing to synthetics, Wool is an active fibre that reacts to changes in body temperature. So it helps you stay warm when the weather is cold, and cool when the weather is hot.

Moderates Humidity

Wool is one of the most breathable fibres. Wool fibres can absorb and store large quantities of moisture vapour, then release it away, evaporating it into the air.

the most comfortable and ecological fiber

Dust filter

While walking on a wool carpet, dust does not rise. Because wool tends not to generate static, it attracts less dust and lint.

High **Flame**Resistance

Wool's chemical structure makes it naturally flame resistant. Whilst cotton fires at 255°C, the temperature must reach 570-600°C before wool will ignite.

Renewable & **Biodegradable**

Wool is a natural and renewable resource. When wool is disposed of, it naturally decomposes in the soil in a matter of months, slowly releasing valuable nutrients back into the Earth, which contributed to grass growing. As long as there is grass, sheep will continue to produce wool. So the renewable cycle will start again.

ANTIQUÉ

COLLECTION

ANTIQUÉ is a collection of high-density carpets with traditional designs, woven from 100% New Zealand Wool. The palette of shades was inspired by handmade rugs. The color combinations create a very chic semi-antique look. This collection will bring to every room a touch of tribal culture.

Pile: **100% New Zealand Wool**

Green Energy

We use Renewable Energy in our production to reduce environmental emissions. The quality is ensured by using Quality Management System ISO 9001:2000 which was successfully implemented in the company.

Size deviation:

The actual dimensions of rugs, runners, and broadloom may differ from those indicated in the size chart, but not exceeding 2% per each side (According to the European standard EN-14159)

Color difference:

Colors in printed and electronic versions of the catalog may differ slightly from the colors of actual carpets. This is related to a different quality of paper, used for the printed version and the different types of screens used to view the electronic version.
